ABOUT ME

I have a decade's worth of experience as a personal trainer and 2 years of experience as a healthcare provider with the aim of helping clients achieve their fitness goals and have a healthier lifestyle. Both of these humbling and fulfilling experiences have contributed to enhancing my teamwork, critical thinking and problem solving skills. When I discovered software development, I realized that the tech field would allow me to apply the skills I've honed to continue my passion for helping others even more!

Nashville Software School || May 2021 - November 2021

Intensive 6 months (Full -Time) Software Development Bootcamp with immersive, lab-based learning in HTML5, CSS3, JavaScript.

- My tech stack is HTML, CSS, Javascript, Slack, JSON Server, Bulma, C#/.NET, Git, ReactJS, Github, MVC, and SQL.
- Created projects by implementing Entity Relationship Diagrams (ERD) for planning.
- Utilized version control with Git and Github for group and individual projects. I also used CSS and Bulma framework to style my web applications.

The Fit Factory || NSS Front-End Capstone

[bhttps://github.com/warrior14/The_Fit_Factory_Capstone](https://github.com/warrior14/The_Fit_Factory_Capstone)

- The Fit Factory is a workout companion app that will educate and motivate users who want to start their fitness journey. The app displays a timer/cooldown countdown for each exercise chosen that includes text to speech feature with Web Speech external API that will communicate with the user. I built this CRUD app with ReactJS, Web Speech API, JSON Server, Bulma Framework and CSS.

Fork To Fit || NSS Back-End Capstone

<https://github.com/warrior14/Fork-To-Fit>

- The Fork To Fit App is a nutrition app that users can utilize to obtain knowledge about healthy macronutrients and customize a meal plan. The app displays a list of healthy carb, fat and protein sources that the users can select from to add to their meal plan. I built this CRUD app with ASP.NET MVC, SQL Server, Bootstrap and CSS.

GROUP PROJECTS

Giffy-Gram

Github : <https://github.com/NSS-Day-Cohort-49/giffygram-lolcatz>

- Giffygram is a Vanilla Javascript app utilizing JSON Server database that allows the users to post their favorite gifs, send each other messages, and view other user's profiles with CRUD functionality.
 - Specifically made the messages portion of the app with all it's functionalities and styling. This project was built with two other teammates and completed the project in the course of a one week sprint
-

WORK EXPERIENCE

Healthcare Provider 2019-2021

- Assisted with each client's activities of daily living.
- Administered medications and took vitals at indicated times.
- Assisted with physical therapy exercises for improvement of muscle coordination and range of motion.

Personal Trainer 2014-2021

- Helping clients develop short- and long-term goals
 - Analysing client behaviour and the client's abilities
 - Training existing clients with their fitness goals and competitions.
 - Giving advice on nutrition, health and lifestyle changes
 - Helping clients with their workouts and advising them about important safety concerns.
-
